"New series with high-flying potential"

PRICE/PERFORMANCE: VERY GOOD

"The 'Revolution' of Celan speakers represents a new series with high-flying potential..."

" [...] The new speakers look fresh and elegant."

LISTENING TEST

" [...] Nevertheless, there was a little surprise in store. Heco's new Celan series not only offers a hefty dose of quantity in the deep bass range, but also quality at its finest. The subwoofer and the rest of the speakers work together as if cast from a single mold. The bass appeared extremely dry and differentiated. With its impressive speed, the reproduction of the bass range is perfect for listening to music; what's more, sufficient depth and level stability are also ensured for opulent home cinema enjoyment."

" [...] The stability of the spatial presentation and the locatability of phantom sources are managed particularly well by the 5.1 set. Even when listening in stereo, whereby only the front two speakers were used without the center speaker, the focus was just as convincing as the image stability. The two slender floorstanding speakers even performed remarkably well in the bass range without the subwoofer."

The set includes:
Celan Revolution 7
Celan Revolution 3
Celan RevolutionCenter 4
Celan Revolution Sub 32A

- ★ Test verdict: VERY GOOD
