

„Extraordinary tower speakers for the living room.“

„[...] The sound is impressively rounded and the Revolution 7 duo also reproduces a good degree of spatiality.“

„[...] The full splendor of the two Celan Revolution 7 units now unfolds. Instruments are positioned in the room with absolute precision. The entire sound pattern „snaps in place“ and leaves an excellent impression. Bass lines are generated with the necessary energy without ever being over-emphatic.“

„[...] The Revolution 7 proves to be a genuine all-rounder that is in its element playing almost any genre of music.“

CONCLUSION

„Heco has once again delivered with its Revolution 7. The high-quality workmanship and beautiful design of the enclosure looks a little futuristic, but it is suitable for any modern living environment. The curved shape of the enclosure with its angled cover lends a charming appearance to the exterior of the speaker. The 7 series is a high-end speaker that impresses with its quick and harmoniously coordinated technology. Heco's units even perform comfortably with a high-power amplifier. Taking workmanship, material quality and the excellent sound into account, the retail price of just under €1,600 for a Celan Revolution 7 is more than reasonable. It even caught my old Sound Master 25 by surprise.“

- ★ Overall rating: 1.0
- ★ Class: Top class
- ★ Price/performance: very good
