

„One-of-a-kind“

The Fullrange Driver

„In addition to the overall design, the exceptional driver of this one-way speaker naturally attracts all attention. The driver with a 210 mm cone, majestically sitting on the front, is the only transducer. This offers a large surface for sound generation, which in turn is a precondition for successful bass reproduction. And this, combined with the cabinet volume and its bass reflex tuning, allows the Heco Direkt Einklang to play down to 32 Hertz. This is a quite reasonable value that many speakers with bigger woofers don't reach...“

To sum up

„The Heco Direkt Einklang is exciting for two reasons: On the one hand it shines by its exceptional appearance, by its amazing retro charm design – this speaker is a real eyecatcher. On the other hand it belongs to the rare species of fullrange speakers and manages to produce full sound by a single driver only. It thus realizes what a single-point sound source promises: a natural, homogeneous sound reproduction. For the high frequencies it is the visually striking whizzer cone that takes care of this, for the low frequencies it is the cabinet volume and the bass reflex tuning.

Thanks to its high efficiency this speaker nicely blends with small amplifiers as well and boasts an overwhelming spatiality even at low levels. Consequently the Heco Direkt Einklang is not only a true eyecatcher, but a true ear-catcher, too.“

- ★ Overall mark: 1.0
- ★ Class: premium class
- ★ Price/performance ratio: excellent
