

„INNOVATIVE POWER MEETS HARMONIOUS SOUND“

“[...] With a great deal of emotion an enormous depth is created in the listening room. The broadband driver ensures that all sound elements reach the listener at the same time, so that a closed, seamless sound pattern is granted. Voices perfectly free themselves from the Direkt Einklang and -as we've known from former Heco speakers- its acoustics is very pleasant and homogeneous. The resolution in the high frequency range is nevertheless appealing with this title, the sound does not appear too dull [...]“

“[...] The sound is always full and at the same time clear, there's just nothing else one would want for. No doubt an impressive performance. [...]“

CONCLUSION

„In the first series of tests the Heco Direkt Einklang presented itself as an entirely first-class loudspeaker. Smartly conceived in terms of technology, acoustically outstanding, and the whole thing complemented by an individual appearance and premium-class workmanship. Those who take technical data seriously might not like the fact that the reproduction of the high frequencies does not go beyond 19 kHz. On the whole however, the high frequency range proves to be very clear and lively, only occasionally there could be even more contours in the last detail. We really like the Direkt Einklang with its firm and cultivated, yet powerful bass. Men's voices are being reproduced excellently, women's voices very well. “

„Innovative technology, really good sound and an excellent finish characterize the Heco Direkt Einklang.“

OUTSTANDING
