„High-Level Allrounder Qualities“

SOUND

„The swap from a massive bass foundation and cutting guitars to warm campfire romanticism works smoothly and without any weakness - a decisive factor for an allrounder, that Heco undoubtedly has launched with their top-level Elementa 300.“

RESULT

„Allrounders sometimes have the reputation of being a compromise, but the Elementa 300 in fact easily overcome this problem as they simply offer top-level quality in all respects. The extremely lively and authentic sound delivers it all: dynamics, emotions or a powerful response. These shelf speakers do not only convince with a very good price-performance ratio, but also perfectly match with any environment - thanks to their elegant and timeless design.“
