„Big hit by Heco:
high-quality and individual
optics, well-balanced and
vivid sound.“

OUTSTANDING

„ [...] We keep straining the little speaker with nasty pieces, that usually require a substantial cabinet size. However, the sound performance of the Tresor is impressive and in terms of bass truly surprising: a lot of power and an outstanding accuracy. No, the Heco does not necessarily need an active subwoofer as a support.“

„ [...] The HECO comes up with a fresh, clear and lively play and delivers a really good performance in vocals and in the bass range.“

CONCLUSION

„The HECO Tresor is a visually stand-alone, very compact and powerful bookshelf speaker. It is actually able to cope with any music style and can therefore be called a true 'all-rounder'. At a price of EUR 999 for the pair, Heco's Tresor is anything but expensive. For this comparatively little money you get elitist workmanship and really good sound.“
